

GREY WATER IS MUCH CLEARER NOW!

Southern Plumbing Plus is pleased to bring another important new product to the market – the grey water recycling system, NovaGrey.

Designed and manufactured in Australia by WaterGurus, the NovaGrey greywater recycling system is a compact, treatment plant which has been designed using WaterGurus's patented MembraneSafe™ technology to treat domestic greywater to an exceptionally high standard. NovaGrey is suitable for installation in all areas (including sewered and unsewered). It can recycle up to 1148 litres of grey-water per day from showers, bath, vanities and laundry, producing high quality, recycled water.

Being only 1410 mm tall, 750 mm wide and 850 mm deep, it is designed to be slim and unobtrusive and easily installed above ground next to your house. The system is odour and noise-free and – made from low density polyethylene – it comes in four different colours: green, blue, grey and cream. It hibernates, saving energy and electricity, when not in use.

The Novagrey difference:

- proven & reliable membrane technology
- chemical free process
- odour free
- lightweight & easy to install
- quiet & economical
- a range of colours

For more information on the NovaGrey systems, contact our environmental sales manager,

COMINGS & GOINGS

JAMES HIBBERSON
Past Financial controller

Sadly we say goodbye to some long-serving staff members this month. But at the same time we welcome a new Financial Controller to the senior management ranks. The company's chief bean counter for the last 6 years, James Hibberson, has accepted a role with a local company which gives him greater management responsibilities.

James has notched up many notable achievements in his time with Southern Plumbing Plus, but his work colleagues will probably remember him most for winning the company's inaugural weight-loss challenge and for his blind and irrational devotion to the Hawthorn Football Club. He'll need a pantechnic to carry out the tonnes of Hawthorn memorabilia stuffed into his office.

James has been replaced by another football fan, but of a different code and with different

CHARLENE BENNETT
Future Financial controller

colours. Charlene Bennett comes from Newcastle and therefore barracks for the Knights. She's been warned that her office walls are to remain unadorned! Charlene's most recent position was with a large construction company in Newcastle where she was financial controller as well as being in charge of human resources and IT. Charlene is up to all the challenges that Southern Plumbing Plus can throw at her.

Also departing in May is Michael Simonis, who has been managing the company's sister store, Renovators Discount Depot, for the last few years. Before that, Michael worked in retail and in the customer service divisions of the company. Michael wants a change of life - which is understandable given the conditions he's had to endure in recent years. RDD is not a pleasant place on a winter's morning when it's minus 6 degrees. Nor is it pleasant

AMBER PITT
Design Sales Consultant

on a January afternoon with a howling north-westerly blowing and its 45 degrees under the metal roof!

Amber Pitt has been a mainstay of the Southern Innovations showroom for the past 7 years. She's been the company's designer too, and many of the displays, counters, offices, kitchens and toilets in our buildings have been designed by Amber. She leaves with a long list of letters, cards and emails from her customers praising her for the assistance she provided. Amber is following her heart off to the big smoke (Sydney) to continue her career in the bathroom & kitchen industry.

So to James, Michael and Amber - thank you for your years of loyal service, and to Charlene, welcome to the Southern team!

MICHAEL SIMONIS
RDD Manager
